

Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Jingyi Wei to our team as a volunteer research assistant for the CoronaNet Research Project. Jingyi was active with our project from 2020-09-22 to 2021-04-14 and, in that time, coded and updated policy information for China. Without the support of our dedicated RAs, such as Jingyi Wei, we would not be able to sustain our pace of policy documentation which, to date, counts more than 100 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see www.coronanet-project.org.

Jingyi has been a country expert for China. This role involves researching and creating a comprehensive overview of government policies enacted in China as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

In addition to being a country expert, Jingyi took on the following additional roles within CoronaNet:

- **Internship:** Jingyi has joined and successfully finished an internship program as part of their work for CoronaNet. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet. Interns are expected to participate consistently in CoronaNet activities and show initiative in taking on new tasks and projects.
- **Editor:** Jingyi coordinates and co-manages the dissemination strategy of CoronaNet, edits the CoronaNet website and research outputs, and coordinates the social media accounts of CoronaNet. This position requires exceptional writing skills, attention to detail, and focus on user experience.
- **Research Article:** Jingyi has written a research article that has been published in the CoronaNet Working Paper Series. This project included developing and executing a research plan, engaging in original data analysis, and writing in clear and concise language accessible for policy makers and the public. Jingyi went through an intensive training and has proven excellent scholarly research expertise. The article can be found online via www.coronanet-project.org
- Jingyi participated in a credit-bearing internship through Nazarbayev University (Kazakhstan), earning 6 ECTS credits. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet, working closely with members of the international team. Interns are expected to contribute 120-140 hours of independent work towards CoronaNet activities and to show initiative in taking on new tasks and projects.

In conclusion, we would like to reiterate our thanks to Jingyi Wei for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
