

Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Aizhan Zhaksygalieva to our team as a volunteer Advanced research assistant for the CoronaNet Research Project. Aizhan was active with our project from 2022-06-27 to 2022-12-18 and, in that time, coded and updated policy information for Indonesia and Cambodia and Brunei and Hong Kong and Philippines and Vietnam. Without the support of our dedicated RAs, such as Aizhan Zhaksygalieva, we would not be able to sustain our pace of policy documentation which, to date, counts more than 100 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see www.coronanet-project.org.

Aizhan has been a country expert for Indonesia and Cambodia and Brunei and Hong Kong and Philippines and Vietnam. This role involves researching and creating a comprehensive overview of government policies enacted in Indonesia and Cambodia and Brunei and Hong Kong and Philippines and Vietnam as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

After gaining sufficient experience and expertise within CoronaNet, RAs are promoted to Advanced Research Assistant, which is the position currently held by Aizhan. This role involves coding an impressive number of 100 policies or more and being engaged as a research assistant for at least 3 months. Advanced research assistants have gained high expertise in PHSM data and the CoronaNet dataset. They have extensive knowledge of the taxonomy and the project structure, and provide support to other research assistants. With their considerable knowledge, they play an integral role in the success of the project.

In addition to being a country expert, Aizhan took on the following additional roles within CoronaNet:

- Internship: Aizhan has joined and successfully finished an internship program as part of their work for CoronaNet. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet. Interns are expected to participate consistently in CoronaNet activities and show initiative in taking on new tasks and projects.

In conclusion, we would like to reiterate our thanks to Aizhan Zhaksygalieva for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
