

Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Anel Rashitova to our team as a volunteer research assistant for the CoronaNet Research Project. Anel was active with our project from 2021-06-07 to 2022-04-13 and, in that time, coded and updated policy information for Russia. Without the support of our dedicated RAs, such as Anel Rashitova, we would not be able to sustain our pace of policy documentation which, to date, counts more than 100 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see www.coronanet-project.org.

Anel has been a country expert for Russia. This role involves researching and creating a comprehensive overview of government policies enacted in Russia as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

In addition to being a country expert, Anel took on the following additional roles within CoronaNet:

- Anel participated in a credit-bearing internship through Nazarbayev University (Kazakhstan), earning 6 ECTS credits. Through an internship, Research Assistants get an insight into, and contribute to, special projects and managerial aspects of CoronaNet, working closely with members of the international team. Interns are expected to contribute 120-140 hours of independent work towards CoronaNet activities and to show initiative in taking on new tasks and projects.
- Anel was a part of the Eurasian Management Team, which involved leading and coordinating the work of RAs collecting data for Eurasian countries. It involves oversight and support of RAs, including conducting regular performance and activity appraisals to guarantee the development of a consistent and up-to-date dataset. Managers are the first point of contact for RA questions regarding research and organizational issues. The role requires a profound knowledge of the construction of the dataset and strong leadership and management skills in order to foster a team spirit among the RAs, enhance their motivation, and develop a positive work environment. Data collection for Eurasian countries is supported by a grant from the National Council for Eurasian and East European Research.

In conclusion, we would like to reiterate our thanks to Anel Rashitova for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.
