

## Certificate of Appreciation

To whom it may concern,

We would like to recognize the outstanding contribution, effort, and dedication of Fiona Valade to our team as a volunteer research assistant for the CoronaNet Research Project. Fiona was active with our project from 2021-04-19 to 2022-06-19 and, in that time, coded and updated policy information for United States. Without the support of our dedicated RAs, such as Fiona Valade, we would not be able to sustain our pace of policy documentation which, to date, counts more than 100 thousand policies from virtually every country in the world.

The CoronaNet Research Project is working to gather comprehensive and global data on government responses to the COVID-19 crisis. This work includes gathering information about which governments are responding to the coronavirus, toward whom policies are targeted (e.g. other countries), the types of policies enacted (e.g. travel restrictions, banning exports of masks) and their timing and duration. For more information, see [www.coronanet-project.org](http://www.coronanet-project.org).

Fiona has been a country expert for United States. This role involves researching and creating a comprehensive overview of government policies enacted in United States as well as collecting and entering new and updated policy information related to COVID-19. Becoming a country expert requires passing a series of trainings on how to code data in the CoronaNet database, which uses a custom Qualtrics survey instrument, keeping up with policy coding on a weekly basis, and attending weekly country- or regional coordination meetings as well as project-wide meetings.

In addition to being a country expert, Fiona took on the following additional roles within CoronaNet:

- **Data Integration Advisor:** This role involves assessing at least 250 policies and integrating more than 200 policies from other datasets as a research assistant. Data Advisors have gained substantial experience in evaluating and coding external PHSM data into the CoronaNet dataset.

In conclusion, we would like to reiterate our thanks to Fiona Valade for supporting these important and time-sensitive collection efforts and for being part of the CoronaNet community.

Luca Messerschmidt, Principal Investigator
